

Television Service for Hospitals

The average patient watches nearly **11 hours** of TV per day.

IMPROVE PATIENT SATISFACTION AND SAVE MONEY

We offer customized commercial satellite TV programming to fit your patient mix and budget. You determine the channels you wish to offer and the amount you wish to spend. Our recommended channel lineups are loaded with the best channels patients want and organized so they are easy to find.

With exceptional value in bulk premium movie channels, we can eliminate dependency on expensive a la carte movie services. A wider lineup can generally be provided for less than current cost and with better patient selections.

CABLE TV CONTENT IN THE FORMAT YOU NEED

Headend systems may be used with or without content protection. We create the headend and delivery method to accommodate existing TV types in use or new installations. Content may be provided in either QAM for delivery over coax or IP for on a network. All formats are available including High and Standard definition and in High definition of Standard Definition QAM, IP or the new highly forgiving 16:9 new analog. Sometimes two standards are used simultaneously for an overlap period to accommodate a 2-6 month changeover over whereby older TVs would receive one type of signal and newer TVs another.

TV SYSTEM WIRING DESIGN, UPGRADES AND TROUBLESHOOTING

With the shift to digital QAM replacing outdated analog systems, many properties are discovering wiring issues they never knew existed. Poor connectors, outdated coax cable, amplifiers which do not pass all frequencies, and unknown cable paths are typical. Through years of renovations and staff changes, it is common to have lapses in documentation. Isolating problems can be challenging. All too often, there's no record of where amplifiers and splitters are located, how wiring is routed. Upgrading to a new digital system can be full of surprises -- but it doesn't have to be with advance planning. Allen takes the time to systematically evaluate and troubleshoot every detail of your system. The result: crisp, clear HD output that your patients expect and enjoy.

TV SALES AND INSTALLATION

We work with most major UL approved hospital-grade commercial television manufacturers. Wall and ceiling-mounted TVs, smart TVs and bedside swing-arm touchscreens. In many cases, the same mounts can be used for various models.

HOW CAN WE HELP?

- Provide monthly cable TV programming service only
- Assist with problem reception areas

SOLUTIONS OFFERED

TV Programming

We have assisted more than 2,000 properties nationwide. Trust your TV system to our experienced team. Allen specializes in providing custom, commercial satellite TV programming to healthcare facilities, with savings averaging 50-70%!
